CLAW**

## PAST

Carbon Claw products of today have been designed and manufactured from our many years of knowledge gained within the Sports and Sporting Goods Industry.

Our Founding Manufacturing Company was established in the 1970's as an Original Equipment Manufacturer (OEM) of Sporting Goods specialising in Boxing, Martial Arts, Fitness Sports and Accessories.

The business itself has grown from strength to strength and now boasts two manufacturing facilities and employs hundreds of skilled workers within the many various departments who have produced and distributed thousands of Quality products worldwide with a reputation for Performance, Durability, Comfort and fit.

## PRESENT

To bring a fresh face to the Boxing and Martial Arts industry sector we are proud to launch the new Carbon Claw branded product ranges.

This Prestigious Carbon Claw brand carries the Kudos of over 30 years of manufacturing tradition's and with the ever evolving in-house design and technology to bring you a quality product that can perform to the growing pace and demands of today's consumer expectations.

Not just relying on our many past years of valued customer reviews and experiences we continually assess and research current consumer trends allowing us to offer you the latest in design, technology and performance.

Our current customer portfolio is comprehensive selling to many clients and associates around the world, from Boxers and Fighters themselves to Personal Trainers, Gyms, Fitness Studio's, Schools Colleges, local Authorities through to retailers and wholesale distributors.

## FUTURE

Engaging with our customers on product feedback is a crucial and integral part of our future product development programme which allows us to create the synergy between ourselves and our continual loyal customer following.

The full Carbon Claw Range will cater to all Sporting Enthusiasts from the beginner to the Professional Sports Person. Our business strategy is to continue to offer exciting products to all types of customer ensuring Carbon Claw has a place and purpose within every household or training facility for years to come.

## PRODUCT RECOMMENDATIONS

All our products have been designed and manufactured to meet a variety of uses within different environments in mind and expectations from our customers.

To help you decide on which products or product ranges suit your own specific needs we have a colour coded system that suggests the most appropriate product for the environment in which it is to be used.

To ensure our customers enjoy many hours of training with their Carbon Claw products we would recommend that you look at the user guide reference table to the right to assist you with your choice of purchase. To further aid the longevity of your new

purchase we recommend you read our Product Use and Safety section to the right.

## Product Use and Safety

All Carbon Claw Products are manufactured to ensure a safe level of use and to minimize risk and injury when purchased from new.

Due to the nature of Combative Sports the performance of the products will diminish over a period of time and advise the user to regularly inspect their products for signs of wear and tear and replace when necessary.

It is the individual's responsibility after a new purchase to ensure the products are used for the correct application as advertised and we cannot accept any liability for the misuse of product and any injuries incurred.

Please note: Punch bag weights may vary by approximately +/- 2kg.

## IMPACT GX-3 SERIES

**THE IMPACT GX-3 SERIES RANGE OFFERS YOU THE ASSURANCE OF PERFORMANCE, RELIABILITY, SAFETY AND COMFORT.**

**If you are a newcomer to the sport of boxing and not sure of your long term fitness program or training strategy then a product or two from the Impact range will ready you for that first leap into the world that is the Science of boxing.**

### Inner Glove

Having a pair of inner gloves in your kit bag can always be useful as they can serve many purposes. With the best efforts your gloves and bag mitts will create odours after a period of time due to bacteria build up, just like trainers. To pro-long the freshness we recommend you use wraps or inner gloves that can help absorb sweat and can be easily washed. The inner gloves are 100% thick elasticated cotton with a generously padded foam knuckle area. The slim-line padding reduces the risk of stretching or causing damage to the inner lining of your bag mitts or gloves when putting your hands inside. The fingers are paired off with a stitched seam; this ensures that the mitt does not ride up the hand when putting the outer bag mitt or glove over the top.

CODE	DESCRIPTION	SIZE
CC-022	Inner Glove	U

### Punching Mitt

This punching mitt has been manufactured from the latest cross fibre bonded weave material giving it flexibility and durability. Generously padded with a combination of performance foams the Impact GX-3 Series punching mitt provides comfort and safety to the user's hands. The hook and loop wrist strap features multi adjustment to suit a variety of wrist dimensions giving full support to the wrist reducing the chance of stress and flexion to the joint area. The moisture wicking anti-microbial lining aids the use of cooling and hygiene. The palm has a vented mesh weave for continual air flow and also incorporates a built in grip bar.

CODE	DESCRIPTION	SIZE
CC-002	Punching Mitt	M/L

### Junior Boxing Glove

The Impact GX-3 Series glove is manufactured from a durable synthetic cross fibre material and incorporating various foam combinations to effectively cushion your hand from impact. For wrist support the glove has a wide supportive hook and loop wrap round closure. The palm has a vented mesh weave for continual air flow and also incorporates a built in grip bar. The inner fabric lining has an anti-microbial lining for use of hygiene. The thumb attached safety feature is a standard to all boxing gloves we manufacture.

CODE	DESCRIPTION	SIZE
CC-001	Junior Glove	80Z

### Sparring Glove

Made from a durable synthetic cross fibre material and incorporating various foam combinations to effectively cushion your hand from impact. The Impact GX-3 Series safety glove has a multi adjustment wide wrist strap closure that will allow for maximum wrist joint support. Inside the glove has a built in finger grip bar to help form that perfect fist and also incorporates the latest moisture wicking anti-microbial material for cooling and hygiene.

CODE	DESCRIPTION	SIZE

CC-007	Sparring Glove	14OZ
CC-008	Sparring Glove	16OZ

### Hook and Jab Curved

A great coaching and sparring aid for the use of training skills such as Balance, speed, movement, distance and punching combinations whilst static or when attempting to simulate an opponent's movement around the ring in a more realistic competitive environment. The Impact GX-3 Series pads are manufactured in varying layers of lightweight foams for greater shock absorbency and also incorporate an anti-slip dome grip feature for the palm. An anti-slip and sweat absorbent material to the finger tips further enhances grip and confidence. At the base of the pad there s additional raised padding to support the wrist when the pads deflect at a multitude of angles whilst being hit. These pads will offer confidence and comfort to any class student.

CODE	DESCRIPTION	SIZE
CC-011	Hook and Jab Curved	U

### Head Guard Cheek Protect

For good all round head protection the Impact GX-3 Series head guard features multi adjustment to the top, rear and chin strap area's ensuring an accurate and comfortable fit. Incorporating lightweight materials this head guard will ensure that it reduces any additional undue stresses on the neck area. Having a wide peripheral vision helps you not only see those punches coming from the front but more importantly from the side as well.

CODE	DESCRIPTION	SIZE
CC-009	Head Guard Cheek Protect	S/M
CC-010	Head Guard Cheek Protect	M/L

### Groin Guard

As a general rule with combative sports, personal protection is vital. Ensuring that vulnerable areas of the body are well protected will allow for your mind to be focused elsewhere. The Impact GX-3 Series groin guard offers easy access to a removable cup and as made totally from a durable elasticated cotton and nylon material is washable friendly. The removable protective cup is of a lightweight nylon/plastic construction.

CODE	DESCRIPTION	SIZE
CC-012	Groin Guard	S/M
CC-013	Groin Guard	M/L

### Abdominal Guard

Good protection is vital to the most vulnerable parts of our body. A generously padded front abdominal guard adds support but not limitations to the free movement of the body. The Impact GX-3 Series groin guard is manufactured from a lightweight foam construction with a sealed in protective cup this all in one flexible guard is an easy fit and with an adjustable strap ensures the guard once in position has little chance of movement.

CODE	DESCRIPTION	SIZE
CC-014	Abdominal Guard	S/M
CC-015	Abdominal Guard	M/L

### Speed Ball

For a speedball to be effective it needs to be cylindrical and inflated to the correct pressure and will require regular on going inflation checks to maintain performance. The Impact GX-3 Series speedball measures 9 inches in length which allows for a slightly larger area to practice and hone those boxing skills on. The outer shell is made from a durable synthetic material that incorporates a sewn in rubber inflatable bladder with a butile valve to minimise air loss. The hanging loop is also an important feature as this needs to be durable but not so thick and wide that it causes unnecessary friction that will wear the loop and slow down the pace of the ball in motion.

CODE	DESCRIPTION	SIZE
CC-016	Speed Ball	9"

### Reaction Ball

With a lot of boxing training aids the importance of hand eye coordination in conjunction with reflex speed is crucial to develop your performance skills. Not always the easiest pieces of equipment to master but once accomplished it not only looks impressive but you are now on your way to incorporating this multi discipline into a more effective fitness training program. To get the best out of the Impact GX-3 Series reaction ball then position it to allow you a full 360 degree rotation around it as this will also help you practice movement and balancing skills as well.

CODE	DESCRIPTION	SIZE
CC-017	Reaction Ball	9"

### Reaction Ball Straps

A pair of heavy duty multi adjustable straps made from a combination of rubber and webbed strapping with a pair of snap lock fixings included. Tension adjustment to the straps will increase or decrease the rebound speed of the ball. Sold as pairs.

CODE	DESCRIPTION	SIZE
CC-037	Reaction Ball Straps	U

## PUNCH BAGS

Punch bags can be a great way to improve your technique, power and endurance whether in conjunction with a fitness training programme, an introduction to boxing itself and the self- preparation for those first steps into the ring, or for the established boxer an important tool to increase their fitness stamina.

Learning to throw punches correctly against a weighted force will help to minimise risk and injury.

Adding a combined balance of movement and correct footwork around a punch bag will allow the punches to flow more easily thus gaining additional power and momentum.

We recommend with all of our punch bags that are hung via a series of 4 or 6 Nylon webbed straps that a swivel fixing is also included as this reduces twisting tension on the straps when the bag rotates.

Swivel fixing purchased separately under Code/CC-044 Maximum weight 35kg.

Punch bag weights may vary by approximately +/- 2kg.

### Punch Bag 2ft

The Impact GX-3 Series punch bag is made to exactly the same proportions to our larger ones and of the same durable cross fibre bonded material. The bags are filled with unused cloth material off cuts for a shock absorbent and realistic punch feel. Once filled the heavy duty zip allows the top to remain securely closed and is further protected by an additional flange of material to keep the zip hidden and unexposed. All our punch bags are double stitched to maximise the wear and tear on them and are hung by four metal D-Rings attached to 4 webbed straps cross sewn into the bag itself.

Size 12" Diameter, approx. Weight 14kg.

Code/CC-044 Swivel Fixing not Included.

CODE	DESCRIPTION	SIZE
CC-018	Junior Punch Bag 2ft 12 Dia	14KG

### Punch Bag 3ft/4ft

The Impact GX-3 Series punch bags are manufactured from very strong cross fibre bonded synthetic material and all seams have been double stitched for added strength and durability. Hung by four webbed straps with metal D-rings that are cross sewn into the bags ensure they give many hours of trouble free training ahead.

The bags are filled with unused cloth material off cuts that vary in weight and size giving it a great shock absorbent and realistic punch feel. Once filled the heavy duty zip allows the top to remain securely closed and is further protected by an additional flange of material to keep the zip hidden and unexposed. Included at the base of the bag is an additional metal D-Ring to attach a fixing or weight to avoid the bag from swinging when doing those heavy workouts.

We recommend with all of our punch bags that are hung via a series of 4 or 6 Nylon webbed straps that a swivel fixing is also included as this reduces twisting tension on the straps when the bag rotates.

Code/CC-044 Swivel Fixing not Included.

## ARMA AX-5 SERIES

**AS WITH ALL CONTINUAL DEVELOPMENT, TODAY'S TRAINERS AND THEIR FITNESS REGIMES REMAIN EVER CHALLENGING AND THE ARMA RANGE HAS BEEN DESIGNED TO COINCIDE WITH THOSE EXPECTATIONS.**

**With the many traditional qualities to these products they are for ever evolving and we continue to ensure the Arma AX-5 Series products offer the latest features and technical materials available today.**

**Having the invaluable knowledge and experience of how products are used on an everyday basis in this sometimes tough environment we have taken our already successful range of items and reviewed all aspects of the component construction from the leathers to the stitching to ensure the Arma AX -5 SERIES stays ahead of the game.**

**All the striking or receiving areas of the Arma range protective equipment as in gloves, mitts, pads and head guards are manufactured from quality leather.**

**Make sure you have some Arma in your kit bag as this will give you the peace of mind that when action calls, you are prepared and ready.**

### Neoprene Gel Wrap

Tailored from a thick Neoprene material these protective training gloves with a thick gel foam padding allows for good knuckle protection for those regular lightweight training sessions. The extended 1.3 metre two inch wide stretch cotton wrist strap is designed to give you plenty of wrist support. The open palm design allows for cooling and flexibility and has a Velcro opening to ensure the gloves go on and off with ease.

CODE	DESCRIPTION	SIZE
CC-038	Neoprene Gel Wrap	S/M
CC-039	Neoprene Gel Wrap	M/L

### Punching Mitt

The Arma AX-5 Series punching mitt has been manufactured from genuine leather that encases the various but specific combinations of foam layer padding. The non-exposed area of the mitt uses our flexible synthetic cross fibre material. An additional feature to the performance, durability and comfort of the product, is an extended wrist strap with a hook and loop closure ensures that a multitude of adjustment will support all wrist dimensions. To allow the hands to breathe the palm has a vented mesh weave material allowing continual air flow to the skin and with the moisture wicking anti-microbial internal lining the heat, sweat and odours are kept to a minimum. This mitt also has a sewn in padded finger grip bar to assist in shaping a perfect clenched fist.

## SABRE AX-5 SERIES

AT CARBON CLAW WE HAVE AN UNDERSTANDING ON HOW PRODUCTS ARE USED WITHIN THE FITNESS/STUDIO ENVIRONMENT AND THIS IS FUNDAMENTAL IN COMBINING THE TECHNICAL ASPECTS WITH THE LATEST DESIGN AND MATERIALS TO COME UP WITH A RANGE OF PRODUCTS THAT WILL BE TESTED IN THE MOST DEMANDING OF TRAINING SESSIONS.

The Sabre AX-5 Series is a comprehensive range of boxing products designed to brush off the regular demands put upon them from Personal Trainers, Coaches, instructors and teachers alike.

On each product the areas of the most potential wear and tear are protected with genuine durable cow hide leather along with additional heavy gauge stitching.

The varying layers of shock absorbent foams create a protective padding reducing the risk of injury, which in turn helps to promote a healthier experience of confidence to allow you to push the performance to the next level.

### Neoprene Gel Wrap

Tailored from a thick Neoprene material these protective training gloves with a thick gel foam padding allows for good knuckle protection for those regular lightweight training sessions. The extended 1.3metre two inch wide stretch cotton wrist strap is designed to give you plenty of wrist support. Punch bag weights may vary by approximately +/- 2kg.

**Punch Bag 3ft/4ft**

The Sabre TX 5 Series punch bag is manufactured from a very strong cross fibre bonded synthetic material and all seams have been double stitched for additional strength.

Filled with textile off-cuts of varying weight and size allows us to balance the weight of the bag and adding a foam lining gives the bag a more authentic feel when punched.

The heavy gauge webbed hanging straps with metal D-Rings will complement the durability of the rest of the bag, and the straps are also cross sewn and stitched into the inner lining of the bag to ensure plenty of hours of training ahead.

Once filled the heavy duty zip allows the top to remain securely closed and is further protected by an additional flange of material to keep the zip hidden and unexposed.

Included at the base of the bag is an additional metal D-Ring to attach a fixing or weight to reduce the bag from swinging when doing those heavy workouts.

We recommend with all of our punch bags that are hung via a series of 4 or 6 Nylon webbed straps that a swivel fixing is also included as this reduces twisting tension on the straps when the bag rotates.

Code/CC-044 Swivel fixing not included.

## AERO AX-5 SERIES

**THE MODERN DAY STUDIO TRAINING SESSIONS ARE MORE VARIED AND THE INSTRUCTORS ARE MORE KNOWLEDGEABLE THAN EVER AND WITH THE VARIETY OF CLASSES ON OFFER THE CHOICE CAN BE OVERWHELMING.**

**But you can be assured with many of the Boxing, Combative and Boot camp classes incorporated in today's regimes, choosing the correct product that is functional, practical and durable can be a sound investment and give you many memorable hours of use.**

**The Aero AX range consists of the most fundamental and essential quality boxing products suitable for the gym/studio environment incorporating all the latest features of performance, safety, comfort and hygiene to give you a trouble free workout.**

**Designed for regular use these products could easily be seen to be used by the Club instructors, coaches and Personal Fitness Trainers alike.**

**Preparation is everything and choosing a lesser product is a compromise not worth taking.**

### Inner Elasticated Wash Mitt

Carrying a pair of lightweight Aero wash mitts in your kit bag can be useful in serving a few purposes. With your best effort your gloves and bag mitts will create odours after a period of time due to the sweat and bacteria build up, just like trainers do. To pro-long the freshness we recommend you use wraps or inner gloves as these will help absorb sweat and therefore reduce odours. Being machine washable will ensure you get that fresh comfort feel time after time when wearing your gloves or mitts. Inner gloves can also be a quick change alternative to hand wraps if you are training within a club or fitness studio environment. Most clubs and studios hold a selection of used gloves for you to use but they may have been used repeatedly by many other members so it is reassuring to wear your own inner mitts before putting the gloves on.

### Punching Mitt

The Aero AX 5 Series punching mitt has been manufactured from genuine leather that encases the various but specific combinations of foam layer padding. The non-exposed area of the mitt uses our flexible synthetic cross fibre material. An attributing factor for the performance, durability and comfort of the product, is an extended wrist strap with a hook and loop closure allowing for a multitude of adjustment that will fully support all wrist dimensions. To allow the hands to breathe the palm has a vented mesh weave material allowing continual air flow to the skin and the moisture wicking anti-microbial internal lining helps to aid cooling and hygiene. The Aero mitt also has a sewn in padded finger grip bar to assist in shaping a perfect clenched fist.

### Pro Gel Wraps

Tailored from a thick Neoprene material these protective training gloves with a thick gel foam padding allows for good knuckle protection for those regular lightweight training sessions. The extended 1.3metre two inch wide stretch cotton wrist strap is designed to give you plenty of wrist support.

The open palm design allows for cooling and flexibility and has a Velcro opening to ensure the gloves go on and off with ease.

### Sparring Glove

The Aero AX 5 Series sparring glove offers an abundance of form and function in equal measure to ensure it delivers on both looks and good all round performance. The outer shell is made from genuine leather and the inner palm from our tried and tested flexible synthetic cross fibre material. The shock absorbent padding has been constructed with various foam layers to attain a balance of realistic punch feel along with a comfortable cushioning effect for the hand on impact. The glove wrist has a wide wrist strap multi-adjustment closure for good support. The inner glove has a built in finger grip bar to help form that perfect fist and also incorporates the latest anti-microbial moisture wicking material for hygiene.

### Hook and Jab Curved

A great coaching and sparring aid for the use of training skills such as Balance, speed, movement, distance and punching combinations whilst static or when attempting to simulate an opponent's movement around the ring in a more realistic competitive environment.

The Aero target pad area is covered in genuine leather which covers varying layers of lightweight foams for greater absorbency. Inside the pad there is an ant-slip dome grip feature for the palm and an anti-microbial moisture wicking material lining to aid cooling and hygiene. A non-slip suede material is used around the finger tips to enhance further grip and confidence.

At the base of the pad there is additional raised padding to support the wrist when the pads deflect at a multitude of angles whilst being hit.

## RECOIL RX-7 SERIES

**BOXING CAN BE A TRULY PUNISHING SPORT, FOR THE BOXER AND THEIR SELECTED TRAINING PRODUCTS ALIKE.**

**On the other hand a great workout in preparation for a bout in the ring can be extremely satisfying, and as the challenges get greater so does the expectation on the individual and the training products they use.**

**The Recoil range is for the boxing enthusiast who wishes to use a performance product that allows them to solely focus on developing their own training style and technical abilities.**

**As with all our quality products the evolution continues but the heritage remains.**

**Taking similar DNA elements that make up our Top Professional Series we have put together the Recoil RX-7 Series all leather and gel padding formulae to ensure you tire before the products do.**

**Carbon Claw products are engineered and then stylised, the engineering and technical performance of the product is laid down before the design team are allowed creative licence, guaranteeing that the end product has an equal measure of form and function.**

**Combining the use of current materials the Recoil RX-7 Series has a retro style design with a modern twist, and importantly quality features that sets a benchmark for others to follow.**

Bag Glove

The Recoil RX 7 bag glove incorporates a generous range of shock absorbent layered foams that compliment an overall consistency of a firm feel that gradually gives and softens through consistent use.

The foam layers have been formed to ensure a natural clenched fist can be maintained with little or no effort.

The hit area has a gel lining under the leather to help dissipate the forces to the hand even before the inner foam layers are called into action.

Other key features are a sewn in finger grip bar, safety attached thumb, a wide wrap around wrist strap with hook and loop closure to allow for a multitude of wrist tension settings creating ideal wrist alignment and support.

The inner glove has a comfort fit lining made from an anti-microbial moisture wicking material to aid cooling and hygiene, along with a mesh weave palm material and additional vent holes to reduce heat build-up.

### Head Guard Cheek Protect

The Recoil RX 7 Series head guard is made from genuine cow hide leather and has multi-adjustment settings to the top, rear and chin sections to ensure a precise non-slip fit. The effective gel layered external padding absorbs the blows to lessen impact and an internal soft padding encased in anti-microbial moisture wicking material helps aid hygiene and comfort.

A good opening around the eyes allows for maximum peripheral vision to see those side hook punches being delivered as well as the front jabs.

CODE	DESCRIPTION	SIZE
CC-067	Head Guard Cheek Protect	S/M
CC-068	Head Guard Cheek Protect	M/L

### Abdominal Guard

As a general rule with combative sports, personal protection is vital. Ensuring that vulnerable areas of the body are well protected will allow for your mind to be focused elsewhere.

The Recoil RX 7 Series groin guard offers a lightweight construction with a sewn in padded cup protector for comfort and ease of flexibility and movement.

The adjustable leg support strap adds to a more specific and comfort fit to the individual without limiting movement.

CODE	DESCRIPTION	SIZE
CC-070	Abdominal Guard	S/M
CC-071	Abdominal Guard	M/L

### Hook and Jab Curved

Manufactured from genuine cow hide leather these quality RX 7 Series pads are designed to ensure they protect both the opponent and the user effectively. The inner palm area is domed allowing for a more natural grip reducing undue stress and tension on the inner forearm muscles and around the dome is an anti-slip material that allows additional grip to the fingers. The outer finger area is perforated for ventilation and an anti-microbial moisture wicking material lining aids cooling and hygiene. Raised padding under the wrist helps to reduce wrist flexion for when those hitting sessions get heavy and a generous layer of gel padding on the hit area ensures the initial impact is absorbed effectively. A good trainee pad for personal trainers and coaches alike as these lightweight pads will offer confidence and comfort to any class session.

CODE	DESCRIPTION	SIZE
CC-069	Hook and Jab Curved	U

### Speed Ball

Manufactured from genuine cow hide leather the Recoil RX 7 Series speedball measures 7 inches in length which is slightly smaller than average to sharpen your hand eye coordination techniques. The internal rubber bladder is our Supra safe model which has been designed to significantly reduce air loss.

The hanging loop is also an important feature as this needs to be durable but not so thick and wide that it causes unnecessary friction that will wear the loop and slow down the pace of the ball in motion.

Inflation P.S.I - Maximum pressure 4lbs

Do not over inflate.

CODE	DESCRIPTION	SIZE
CC-072	Speed Ball	7"

### Reaction Ball

Made from genuine cow hide leather this 7 inch small size ball enables a more intermediate/advanced level workout due to the slightly increased difficulty in hitting the reduced surface area on offer. The smooth surface along with the consistent machine stitched seams ensures the ball is cylindrical and streamlined. The sewn in Supa safe rubber bladder has a butile valve to significantly reduce air loss ensuring the ball continues to perform and function effectively but to maintain product performance the ball will require regular on going inflation checks. To increase or reduce the rebound speed of the ball the straps will require tension adjustment.

Straps purchased separately under Code/CC-037.

CODE	DESCRIPTION	SIZE
CC-073	Reaction Ball	7"

### Reaction Ball Adjustable Straps

A pair of heavy duty multi adjustable straps made from a combination of rubber and webbed strapping with a pair of snap lock fixings included. Tension adjustment to the straps will increase or decrease the rebound speed of the ball. Sold as pairs.

CODE	DESCRIPTION	SIZE
CC-037	Reaction Ball Adjustable Straps	U

### Punch Bag 4ft

An ideal club bag that has been constructed to withstand those regular and sometimes heavy workout sessions imposed on it. The Recoil RX 7 Series punch bag is manufactured from a very strong SV1 cross fibre bonded synthetic leather grain material and all seams have been double stitched for additional strength. Filled with textile off-cuts of varying weight and size allows us to balance the weight of the bag and adding a 20mm foam lining gives the bag a more authentic feel when punched. The heavy gauge webbed hanging straps with metal D-Rings are cross sewn and stitched into the inner lining of the bag which will complement the durability of the rest of the bag. A heavy duty zip allows the top cover to remain securely closed and is further protected by an additional flange of material to keep the zip hidden and unexposed. Code/CC-075 Chain Set 4 Strand not included.

CODE	DESCRIPTION	SIZE
CC-074	Punch Bag 4ft x 13.5 Dia	30KG

### Punch Bag Chain Set 4 Strand

Boxing equipment products are constantly being worn down so the design and durability in conjunction with the correct practical day to day use of our products enables us to understand the key features, strengths and sometimes the vulnerable parts of the product that will take the most abuse. Having punch bags consistently swinging and rotating causes additional strain on items such as the chains and wall brackets which in turn increases the wear and tear factor. Incorporated into the top of the chain is a swivel fixing with a snap lock clip above and below it, and if this was to wear through a replacement can be purchased saving the expense of buying the whole chain unit. The plated steel chains have separately welded links and incorporate their own snap lock fixing to clip to the punch bag D-rings so as not to shake loose. Maximum weight 35kg

## AMT CX-7 SERIES

**WITH ALL PROFESSIONAL SPORTS TODAY THE EXPECTATIONS ON THE YOUNG ATHLETE IS IMMENSE, AND TRAINING AT AN EARLY AGE ENSURES THEY ARE IN THEIR PRIME WHEN COMPETING AT TOP LEVEL.**

**As a sport Boxing is not on its own when searching for tomorrows champion and inevitably these can be found training in the many hundreds of established youth boxing clubs around the country.**

**Funding with any sport at grass roots level is always hard to come by and many of these clubs run on a completely voluntary basis, with parents, teachers, and coaches alike investing their own time and money into finding the next champion and all costs including the purchase and/or replacement of products has to be considered carefully.**

**The AMT CX-7 Series have been carefully crafted with a combination of genuine leather and synthetic leather materials for performance and durability offering a sound investment to any club.**

**Allowing for development and maturity of today's youth there is a comprehensive range of weights and sizes available.**

### Sparring Glove

The AMT CX-7 Series glove is made from genuine cow hide leather and carries a pedigree of many years of development and brings together all the crucial elements to create a perfect synergy making this one of our best all round products. The shock absorbent padding consists of a balance of weighted layered foams to perform as well on bag work as sparring sessions. An internal elasticated ring closure fixture allows you to put on and remove the glove with ease. The wide supportive cuff strap will encase the wrist and support it at any specific tension you require once the hook and loop closure is applied. The thumb tip is attached safely to the main body of the glove to avoid the thumb acting independently and bending backwards if an incorrect punch is performed.

### Hand Wraps 3.5 Mtr

When training regularly protection of the hands is crucial. There are 27 bones in the human hand and wrist so you can see the benefits with long term training that you protect them carefully, as damage to any one of these bones will severely limit your training progress. The AMT CX-7 Series hand wraps not only provide crucial support to the bones but will also offer extra padding inside the glove if the glove fits incorrectly or shows signs of wear. A pair of 3.5 metre in length stretch cotton hand wraps allows enough elasticity to ensure you can apply the correct tension of support to the hands effectively. Being washable they also help to keep your glove linings in as fresh a condition as possible.

CODE	DESCRIPTION	WIDTH
CC-109	Hand Wraps 3.5 Mtr	50MM

### Club Protector Abdominal Guard

As a general rule with combative sports, personal protection is vital. Ensuring that vulnerable areas of the body are well protected will allow for your mind to be focused elsewhere. The AMT CX 7 Series Abdominal guard is manufactured from soft leather and offers a lightweight construction with a sewn in padded cup protector for comfort and ease of flexibility and movement. The adjustable leg support strap adds to a more specific fit to the individual.

CODE	DESCRIPTION	SIZE
CC-110	Club Protector Abdominal Guard	S
CC-111	Club Protector Abdominal Guard	M
CC-112	Club Protector Abdominal Guard	L

### Air Pad

The AMT CX-7 Series Air pads are made from genuine leather and a combination of flexible lightweight materials allowing them to flex naturally when the inner foams are being compressed. The foam layer padding is constructed to create an air cushion that gives on contact allowing a greater absorption of pressure when the pad is being struck. Additional padding has been layered around the edge of the pads so as to counter the opponent's punches forcing them to bob and weave effectively. Internally is an anti-slip material that allows additional grip to the fingers reducing further movement of the pad when struck. The outer finger area is perforated for ventilation allowing the anti-microbial moisture wicking material to aid cooling and hygiene.

CODE	DESCRIPTION	SIZE
CC-114	Air Pad	U

### Medicine Balls

The AMT CX-7 Series 8 panel traditional medicine balls are made from genuine leather. Hand filled with a mixture of shredded textiles the anti-bounce ball is used for many of the old school well proven traditional training methods like military squat and throw, sit ups, overhead ab crunches with twist and throw, to more recent core strength and flexibility exercises such as off balance press-ups and vertical twists.

## Punch Bag 4ft

An ideal club bag that has been constructed to withstand those regular and sometimes heavy workout sessions imposed on it.

The AMT CX-7 Series punch bag is manufactured from genuine leather with double stitched seams for additional strength and durability.

Filled with textile off-cuts of varying weight and size allows us to balance the weight of the bag giving the bag a more authentic feel when punched.

The heavy gauge webbed hanging straps with metal D-Rings are cross sewn and stitched into the inner lining of the bag which will complement the durability of the rest of the bag.

A heavy duty zip allows the top cover to remain securely closed and is further protected by an additional flange of material to keep the zip hidden and unexposed.

Sewn to the base of the bag is an additional metal D-Ring to attach a fixing or weight to reduce the bag from swinging when doing those heavy workouts.

We recommend with all of our heavier punch bags hung with either our 4 or 6 strand chains that the swivel fixing attachments are checked regularly for wear and tear. This swivel fixing can be replaced separately without complete replacement of the chain set.

Code/CC-075 Chain Set 4 Strand not included.

CODE	DESCRIPTION	SIZE
CC-113	Punch Bag 4ft x 14 Dia	30KG

## Punch Bag Chain Set 4 Strand

Boxing equipment products are constantly being worn down so the design and durability in conjunction with the correct practical day to day use of our products enables us to understand the key features, strengths and sometimes the vulnerable parts of the product that will take the most abuse. Having punch bags consistently swinging and rotating causes additional strain on items such as the chains and wall brackets which in turn increases the wear and tear factor. Incorporated into the top of the chain is a swivel fixing with a snap lock clip above and below it, and if this was to wear through a replacement can be purchased saving the expense of buying the whole chain unit. The plated steel chains have separately welded links and incorporate their own snap lock fixing to clip to the punch bag D-rings so as not to shake loose. Maximum weight 35kg

## PRO X-ILD 7 SERIES

**WHEN GOING INTO BATTLE THE WEAPONS OF CHOICE ARE OF PERSONAL PREFERENCE.**

**Top champion fighters are a special breed but they are only human and very individual at that, they have strengths and weaknesses like any other, and although these are recognised and can be built upon, some traits whether good or bad are genetic and the true fighter will play to the strengths and compensate where they can for their weaknesses.**

**A great puncher will possibly require a less padded glove to take advantage of the force of the punch they can throw at their opponent, but a less powerful puncher but an endurance fighter may want a more padded glove to stave off initial attack and to tire their opponent out over many rounds before causing a late stoppage.**

**Carbon Claw calls this the Effective but Protective syndrome when looking at manufacturing their gloves and realise that no one particular glove type will suit all boxers.**

**Ask any fighter on their favourite gloves and you may get a thousand different replies, some will choose for technical reasons comfort and fit, others may have superstitious reasons perhaps due to a winning streak and are reluctant to change the gloves, others may have received a hand injury and decided it was the glove that caused the damage and will never use again.**

**What we do recognise is when you enter the ring and the bells goes you and your gloves are in a solitary place, and wearing good fight gloves is a must and the PFG BX-7Series will not disappoint.**

### Hand Wraps 5 Mtr

When training regularly protection of the hands is crucial. There are 27 bones in the human hand and wrist so you can see the benefits with long term training that you protect your hands carefully, as damage to any one of these bones will severely limit your training progress. The PRO X ILD-7 Series hand wraps not only provide crucial support to the bones but will also offer extra padding inside the glove if the glove fits incorrectly or shows signs of wear. A pair of 5 metre in length stretch cotton hand wraps allows enough elasticity to ensure you can apply the correct tension of support to the hands effectively. Being washable they also help to keep your glove linings in as fresh a condition as possible.

### Pro Bag Glove

The Pro X 7 Series bag glove has been designed for just that purpose, prolonged hours of professional training when honing those power and agility skills on the punch bag. The glove is encased in a quality supple leather goat hide to allow the glove to flex naturally under load. The construction of the glove has a built in gel foam layer allowing the specific area of forced impact to be absorbed but at the same time reducing the impact force on the other supportive glove areas of the hand and wrist. Utilising denser combinations of padded foam than the spar glove ensures durability and longevity of the glove when applying those regular power shots to the punch bag.

CODE	DESCRIPTION	SIZE
CC-133	Pro Bag Glove	12OZ
CC-134	Pro Bag Glove	14OZ
CC-135	Pro Bag Glove	16OZ

### Pro-Sparring Glove

The PRO X 7 Series sparring glove carries the whole ethos of what Carbon Claw is about when offering a product that combines Performance, quality and comfort. Made from only the best supple leather goat hide it allows the glove to flex naturally. The construction of the glove offers a combination of foams which includes a gel foam layer allowing the specific area of forced impact to be absorbed but at the same time reducing the impact force on the other supportive areas of the hand and wrist.

### Professional Fight Glove

The Tigris Sondaica Fight Glove (Latin for Javan Tiger) combines quality and performance. Manufactured from choice leathers this glove is hand crafted and hand stitched for added strength. The PFG BX-7 Series glove is padded with an Injection Moulded Foam (IMF) of medium to firm consistency that contributes to a well-balanced glove. Shaped in a natural curve to simulate a fist position with a built in padded finger grip bar the shaped foam construction helps reduce undue tension on the forearm muscles.

### Hook and Jab Pad-Heavy Hit

The PRO X-ILD-7 Series includes a selection of our premium coaching pad styles, made from only the best quality supple leather goat hide and a combination of flexible lightweight materials. This heavy hit model has a target pad area incorporating a gel foam layer that catches the initial impact and quickly absorbs the force to protect both the opponent and the user. The internal part of the mitt has a palm domed area allowing for a more natural grip reducing undue stress and tension on the inner forearm muscles. Incorporated around the dome is an anti-slip material that allows additional grip to the fingers reducing further movement of the pad when being hit. The outer finger area is perforated for ventilation allowing the anti-microbial moisture wicking material to aid cooling and hygiene.

CODE	DESCRIPTION	SIZE
CC-137	Hook and Jab Pad Heavy Hit	U

### Hook and Jab Pad-Speed

Coaching pads are a crucial training aid to teach skills such as Balance, speed, movement, distance and punching combinations whilst static or when attempting to simulate an opponent's movement around the ring in a more realistic competitive environment. Classed as a premium coaching pad they are made from only the best quality supple leather goat hide along with a combination of flexible lightweight materials. Incorporated within the target area is a gel layer acting to absorb the impact effectively to protect both the opponent and the user. The 7 inch diameter pads are very light and are specifically used for speed training, enhancing the development of Hand eye co-ordination, speed, agility and balance. The internal part of the mitt incorporates an anti-slip material that allows additional grip to the fingers reducing further movement of the pad when being hit.

### Head Guard

The important manufacturing aspects of our head guards are that they are practical in their use and are of lightweight construction, comfortable and provide good all round protection. The PRO X-ILD -7 Series head guard is manufactured from the best supple leather goat hide materials and incorporates the latest gel layer padding to dissipate the power of the punches on contact. The use of external and internal foam layers combined with an anti-microbial moisture wicking material lining makes for a premium head guard that offers safety comfort and hygiene. With all good head guards once fitted they need to stay in place and the PRO X head guard does not disappoint, with multi-adjustment at the top, rear and chin sections to allow a precise and non-slip fit.

CODE	DESCRIPTION	SIZE
CC-140	Head Guard	S/M
CC-141	Head Guard	M/L

### Speed Ball

Manufactured from the latest genuine leather goat hide materials the PRO X Speedball measures only 6 inches in length which is a couple of inches smaller than average to sharpen the hand eye co-ordination. We would recommend that practitioners of intermediate or advanced level will benefit from using this smaller ball.

CODE	DESCRIPTION	SIZE
CC-144	Speed Ball	6"

### Reaction Ball

Made from supple genuine leather goat hide, this small ball enables an advanced level of workout due to the increased difficulty in hitting the reduced surface area on offer. The smooth surface along with the consistent machine stitched seams ensures the ball is cylindrical and streamlined. CC-037 Straps not included.

CODE	DESCRIPTION	SIZE
CC-145	Reaction Ball	6"

### Punch Bag 4ft

The PRO X ILD-7 Series punch bag is manufactured from genuine leather and all the seams have been double stitched for additional strength. This bag carries the pedigree and knowledge of many years of manufacturing. A top professional boxing bag that has been specifically designed and engineered to take the punishment of today's top professional athlete.

CODE	DESCRIPTION	SIZE

## GRANITE GX-5 SERIES

**THE HISTORY OF ARMED COMBAT AND SELF- DEFENCE ARCS BACK MANY THOUSANDS OF YEARS.**

**Styles of Combat greatly varied from pure attacking styles to pure defensive styles like Aikido that uses the attackers force and redirects their energy with little strength required into a lock or defensive move, avoiding the direct energy head on.**

**There are the purists who follow the old teachings and practices of the Traditional Martial Art styles like Aikido, Karate, Judo and Taekwondo where the Sensei/Grand masters were a true influence on the style that they taught.**

**This practice continues today where many thousands of independent club instructors have a strong belief that their own individual style has the edge over other style's, and by adding more modern training elements to the traditional style whilst maintaining the core fundamental training elements of the Traditional practises they feel an advantage is gained.**

**The Granite range is a core range of training products allowing you to further the progress of your practiced art with confidence.**

**Made from a combination of leather and synthetic materials the Granite range products are designed to perform with these ever increasing modern developments.**

**The range has great visual Impact but stays true to the Carbon Claw Ethos of quality, performance and practicality.**

### Grappling Glove-No Thumb 4oz

The Granite GX 5 Series grappling glove offers all the protection for a hard working session on the mat, allowing plenty of padding but also flexibility for those specialised grab and hold techniques. The external striking area is manufactured from genuine leather that encases the various but specific combinations of foam layer padding. The non- exposed area of the mitt uses our flexible synthetic cross fibre material. With no thumb the palm has very little material allowing for a more natural grip and holding position. With the palm exposed this allows plenty of ventilation reducing heat build- up. The glove incorporates 2 wrap adjustment systems. The inner adjustment is to ensure the glove is comfortably gathered around the wrist area.

CODE	DESCRIPTION	SIZE
CC-204	Grappling Glove No Thumb 4oz	M/L
CC-205	Grappling Glove No Thumb 4oz	L/XL

### Grappling Glove Spar 7oz

The Grappling Spar glove offers the all-round hand protection when performing stand up strikes but the flexibility to draw your opponent in with your grab and hold techniques. A good circuit training glove that allows you to cross train between your product training and your physical opponent training within a single class session. The Granite outer shell is made from genuine leather and the inner palm from our tried and tested flexible synthetic cross fibre material. This safety glove incorporates a generous padding of layered foam combinations around the knuckle area to effectively absorb impact. The inner and outer multi adjustable hook and loop closure systems ensures the glove sits correctly on the hand and around the wrist before the elongated wrist strap is applied for all round effective support.

CODE	DESCRIPTION	SIZE
CC-208	Grappling Glove Spar 7oz	M/L
CC-209	Grappling Glove Spar 7oz	L/XL

### Grappling Shin Guard

The Granite GX 5 Series grappling shin guards offer good lower leg protection for those Mixed martial arts training sessions. The lightweight and flexible construction is ideal for the protection of low kick blows in stand up and non-restrictive in movement if taken down to the mat. The open back design uses a 4mm padded outer neoprene sock with a hook and loop cross over fixing allowing a secure comfort fit to the calf area enabling very little resistance when perfecting your ground work. A flexible 10mm of EVA shock absorbent padding is used to the front of the shin as well as the foot area and an easy slip elasticated strapping sits under the foot to eliminate the pad from lifting and exposing the toe bone area. The inner lining has an anti-microbial moisture wicking material to reduce heat build, the easy clean material keeps the perspiration away from the skin assisting cooling and hygiene.

CODE	DESCRIPTION	SIZE
CC-215	Grappling Shin Guard	M
CC-216	Grappling Shin Guard	L

### Thai Shin Guard

The Granite GX 5 Series Thai shin guard incorporates a durable shock absorbent bonded EVA padding protecting the frontal shin bone and that continues over the foot to the instep area protecting the toe bones against elbow and hip strikes. At the rear it has two multi adjustment straps with a hook and loop closure fixing to ensure the guard does not slip under duress.

The inner lining has an anti- microbial moisture wicking material to reduce heat build, the easy clean material keeps the perspiration away from the skin assisting cooling and hygiene.

CC-218	Thai Shin Guard	M
CC-219	Thai Shin Guard	L
CC-220	Thai Shin Guard	X/L

### Thai Hand Pad Target Shield

The Granite GX 5 Series target shield is a core training aid when practising correct body blows, with two generously padded leather grab handles it allows for a greater use of flexibility within a workout session as a multitude of strikes from all angles can be negated with the correct positioning of the shield allowing the opponent to practice all types of punches, elbow and leg strikes to the body and thigh areas. Constructed from layers of air foam padding this lightweight shield absorbs the power effectively Used correctly it can dictate pace, power and performance to the opponents workouts. Sold as a single unit.

CODE	DESCRIPTION	SIZE
CC-211	Thai Hand Pad Target Shield	U

### Thai Pad Curved

The Granite GX 5 Series Thai pad is a great training aid for drawing in and countering those Knee and elbow strikes.

Absorbing such impact you need the assurance and quality of this generously padded Thai pad to absorb and deflect the forces whilst having a secure grip on the product.

The Lightweight shock absorbent padding has been constructed with various foam layers for a greater cushioning effect.

The 2 re-enforced leather straps to the forearm and wrist are of hook and loop closure allowing a multi adjustment for correct support and the well-padded handle allows you to maintain a sturdy grip at all times.

The Thai pad strike area is made from our tried and tested flexible synthetic cross fibre material.

Sold as a single unit

CODE	DESCRIPTION	SIZE
CC-210	Thai Pad Curved	U

### Curved Strike Shield

The Granite GX 5 Series Lightweight Curved strike shield has been developed to endure the harshest of workouts. On impact the compressed force of air travels through the layers of foam and is then allowed to escape via the side vents reducing the unnecessary pressure on the zip area and the internal material seems reducing the opportunity of the stitching blowing and the seam's splitting. On the reverse of the shield there are two forearm straps along with a double stitched re-enforced leather grab handle for an assured grip.

CODE	DESCRIPTION	SIZE
CC-212	Curved Strike Shield	U

## Head Guard

The Granite GX 5 Series head guard incorporates all the benefits and protection of our traditional head guard designs.

The important manufacturing aspects of our head guards are that they are practical in their use and are of lightweight construction, comfortable and provide good all round protection.

CODE	DESCRIPTION	SIZE
CC-213	Head Guard	S/M
CC-214	Head Guard	M/L

## Punch Bag Swivel Fixing

Boxing equipment products are constantly being worn down so the design and durability in conjunction with the correct practical day to day use of our products enables us to understand the key features, strengths and sometimes the vulnerable parts of the product that will take the most abuse. Having punch bags consistently swinging and rotating causes additional strain on items such as the chains and wall brackets which in turn increases the wear and tear factor. Incorporated into the top of the chain is a swivel fixing with a snap lock clip above and below it, and if this was to wear through a replacement can be purchased saving the expense of buying the whole chain unit. The plated steel chains have separately welded links and incorporate their own snap lock fixing to clip to the punch bag D-rings so as not to shake loose. Maximum weight 45kg

CODE	DESCRIPTION	SIZE
CC-155	Punch Bag Swivel Fixing	N/A

## Strike Bag 5ft

Punch bags can be a great way to improve your boxing or striking techniques, adding accuracy, power and endurance.

Learning to distance your body correctly for either hand or leg strikes is important to ensure the full power is applied at the point of impact.

The Granite GX 5 Series Strike bag has been manufactured from a very strong cross fibre bonded synthetic material and all seams have been double stitched for additional strength. Filled with textile off-cuts of varying weight and size allows us to balance the weight of the bag and adding a 20mm foam lining gives the bag a more authentic feel when punched.

The heavy gauge webbed hanging straps with metal D-Rings will complement the durability of the rest of the bag, and the straps are also cross sewn and stitched into the inner lining of the bag to ensure plenty of hours of training ahead.

Once filled the heavy duty zip allows the top to remain securely closed and is further protected by an additional flange of material to keep the zip hidden and unexposed.

Included at the base of the bag is an additional metal D-Ring to attach a fixing or weight to reduce the bag from swinging when doing those heavy workouts.

We recommend with all of our punch bags that are hung via a series of 4 or 6 Nylon webbed straps that a swivel fixing is also included as this reduces twisting tension on the straps when the bag rotates.

Code/CC-155 Swivel fixing not included.

## RAZOR RX-7 SERIES

THE TERMINOLOGY OF MARTIAL ARTS HAS CATEGORISED FOR MANY YEARS THE THOUSANDS OF ESTABLISHED TRADITIONAL FIGHTING STYLES THAT IS BEING PROMOTED AROUND THE WORLD TODAY.

Recently there has been a more unconventional collaboration of fighting Arts known as MMA (Mixed Martial Arts) which takes a selection of the traditional practices of martial arts and combines them together.

This allows the fighter to draw upon the experience of various fighting styles dependant on what the situation demands.

Having a broader understanding of varying fighting styles allows for the preparation for situations of stand-up combat, ground combat, or more commonly both where the confrontation may generally start whilst standing opposed but frequently ends up going to the floor.

MMA has taken the core forms of Jiu Jitsu, Roman Greco wrestling, Boxing and Judo to combine a style that requires training for flexibility, endurance, power and strength which in turn demands a more specialised training regime.

### Grappling Glove Competition 4oz

The Razor Rx Competition glove weighs in at 4oz as required.

Padded with shock absorbent layers of foams this glove has the fit and flexibility for those awkward grab and hold techniques and ensuring enough knuckle protection for those stand up strikes.

The hook and loop closure wrist strap supports the wrist and ensures the glove does not get pulled off.

The inner lining is made from an anti-microbial moisture wicking material to allow for ventilation and hygiene.

CODE	DESCRIPTION	SIZE
CC-230	Grappling Glove Competition 4oz	M/L
CC-231	Grappling Glove Competition 4oz	L/XL

### Grappling Glove-6oz-No Thumb

The Razor Rx grappling glove offers all round protection for a hard working session on the mat, allowing plenty of padding for those strike techniques but also flexibility for those specialised grab and hold manoeuvres. Manufactured from genuine leather that encases the various but specific combinations of foam layer padding this glove offers form and function to any good training session. With no thumb the palm has very little material allowing for a more natural grip and holding position. With the palm exposed this allows plenty of ventilation reducing heat build-up. The glove incorporates an inner and outer wrist strap adjustment system ensuring the wrist is fully supported and the gloves do not ride or slip. The double outer wrap around wrist strap has a strong hook and loop closure that allows for multiple adjustments ensuring a precise fit around the wrist.

CODE	DESCRIPTION	SIZE
CC-232	Grappling Glove 6oz No Thumb	M/L
CC-233	Grappling Glove 6oz No Thumb	L/XL

### Grappling Glove Spar

The Razor RX Grappling Spar glove offers all round hand protection when performing stand up strikes but the flexibility to draw your opponent in with your grab and hold techniques. A very good circuit training glove that allows you to cross train between your equipment training and your physical opponent training within a single class session.

Once wearing these gloves you will appreciate not only the comfort feel but the design and development that has gone into making the gloves perform as good as they look. Manufactured from quality supple and durable hide leather the user can be sure to have plenty of hours of enjoying the art of Mixed Martial Arts Training. The leather outer shell covers a generous padding of layered foam combinations to effectively absorb impact.

It is very important on impact that the wrist is aligned to the forearm area to eliminate stress on the joints so there are two adjustable wrist strap systems incorporated to ensure the glove stays safely in place and supports the wrist effectively. The outer strap systems with its multi adjustable hook and loop closure will ensure the elongated wrist strap wraps fully around the wrist for effective support.

The open hand design allows continual air flow to the skin and with the moisture wicking anti-microbial internal lining helps aid the reduction in heat build-up and hygiene.

CODE	DESCRIPTION	SIZE
CC-234	Grappling Glove Spar	M/L
CC-235	Grappling Glove Spar	L/XL

### Thai Sparring Glove-Mala

The Razor RX Thai Sparring gloves are manufactured from quality leather materials and when you slip your hand inside you will notice the ergonomic design that the glove forms to position your hand into a perfect clenched fist position around a built in padded grip bar. Your hand is further supported from all sides with comfortable layers of internal padding. Incorporating the latest dye cut foams these gloves offer professional sparring performance with excellent shock absorbency.

A wide supportive hook and loop closure system around the wrist allows for multi-adjustment support along with a tie in safety thumb feature that ensures the thumb is not exposed to injury. The thumb and palm have vented holes allowing continual air flow to the skin along with moisture wicking anti-microbial internal lining for cooling and hygiene.

CODE	DESCRIPTION	SIZE

### Thai Pad Curved

The Razor RX 7 Series leather Thai pad encompasses all the fundamental elements of a professional training aid for drawing in and countering those Knee and elbow strikes. The Lightweight shock absorbent padding has been constructed with various foam layers for a greater cushioning effect to absorb and deflect those heavy blows whilst having a secure grip on the product.

The 2 re-enforced straps to the forearm and wrist are of hook and loop closure allowing a multi adjustment for correct arm support and the well-padded leather handle allows you to maintain a sturdy grip at all times. All the product seams have been re-enforced with double stitching and using only quality thread.

The Arm straps have a double lined loop system incorporating heavy duty webbed strapping and internal materials sewn beneath the outer material surface to ensure a more durable locking strap mechanism around the forearms.

Sold as a single unit

CODE	DESCRIPTION	SIZE
CC-241	Thai Pad Curved	U

### Head Guard Top Protect

The Razor RX head guard has all the benefits and protection of our traditional designs but with an added padded feature to the top of the head in case of a random roundhouse or axe kick slipping through the defence.

The important manufacturing aspects of our head guards are that they are practical in their use and are of lightweight construction, comfortable and provide good all round protection. It has multi-adjustment settings at the top, rear and chin sections to ensure a precise non-slip fit.

The effective external padding absorbs the blows to lessen impact and an internal soft padding encased in anti-microbial material is used for hygiene and comfort. A good opening around the eyes allows for maximum peripheral vision to see those side hook punches being delivered as well as the front jabs.

CODE	DESCRIPTION	SIZE
CC-242	Head Guard Top Protect	S/M
CC-243	Head Guard Top Protect	M/L

### Head Guard Front Bar

The Razor RX full face head guard has all the benefits and protection of our traditional designs but with an added face bar feature protecting the front of the face from punches and strikes that may find their way through with a more conventional head guard design. The important manufacturing aspects of our head guards are that they are practical in their use and are of lightweight construction, comfortable and provide good all round protection. Having multi-adjustment settings at the top, rear and chin sections will make sure you can set your head guard to fit comfortably and with a precise non-slip fit. The effective external padding absorbs the blows to lessen impact and an internal soft padding encased in anti-microbial material is used for hygiene and comfort.
